## **DETAILED ACTION**

1. Applicant's amendment filed 8/17/04 has been entered and made of record.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 15-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 recites the limitation "the plurality of color components" in line 5. There is insufficient antecedent basis for this limitation in the claim. Claims 20 and 21 are also rejected for the same reasons.

Dependent claims 16-19 are also rejected for the same reasons as above.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 5. Claims 1-2, 5-6, 15, 18, and 20-21 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's admitted prior art [Figure 1. Referred as The AAPA].

Regarding claim 1, the AAPA teaches: an input unit arranged to input image data [see "scanner with device ID SA" shown in figure 1]; and an embedding unit arranged to embed first information and second information in the image data as electronic watermark information [see SA and CA embedded into image shown in figure 1], the second information representing whether the first information is the latest information [see page 2 last paragraph].

Regarding claim 2, the AAPA further teaches the first information specifies said apparatus [see ID SA shown in figure 1].

Regarding claims 5-6, these claims are also rejected for the same reasons as set forth in claim 1 above.

The advanced statement as applied to claim 1 above are incorporated herein. With regard to claim 15, the AAPA teaches at least one of the plurality of color components in the image [see page 2 first full paragraph].

Regarding claims 20 and 21, these claims are also rejected for the same reasons as set forth in claim 15 above.

Regarding claim 18, the AAPA further teaches binary data [see digital image in second full paragraph of page 2].

- 6. Claims 3-4, 16-17, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duy M Dang whose telephone number is 703-305-1464. The examiner can normally be reached on Monday to Friday from 5:30AM to 2:00PM...

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo H Boudreau can be reached on 703-305-4706. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

and it is unclear the "third information" or "fourth information" or both "third and fourth information" represents the latest information.

Likewise, claims 6, 15, and 20-21 are also rejected for the same reasons as claim 1 above.

Dependent claims 2, 4, and 16-19 are also rejected for the same reasons as above.

Regarding claim 4, wherein the first and third information specifies said apparatus

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duy M Dang whose telephone number is 703-305-1464. The examiner can normally be reached on Monday to Friday from 5:30AM to 2:00PM..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo H Boudreau can be reached on 703-305-4706. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
